What is Israel's capital city?

Israel's capital city is **Jerusalem**. It is one of the most significant cities in the world, with religious importance to Judaism, Christianity, and Islam. However, the status of Jerusalem is a topic of political controversy, as both Israel and Palestinians claim it as their capital. The international community has varying positions on this issue.

Today

What is Israel's capital city?

Israel considers *Jerusalem* its capital city, and most of its government institutions, including the Knesset (parliament) and the Prime Minister's residence, are located there.

However, this is a subject of international debate. Many countries and international organizations historically did not recognize Jerusalem as Israel's capital due to the ongoing Israeli-Palestinian conflict, and they maintained their embassies in Tel Aviv. In recent years, some countries, including the United States, have officially recognized Jerusalem as Israel's capital and moved their embassies there.

So, while Jerusalem functions as Israel's capital, the issue remains politically sensitive on the global stage. If you'd like to explore the historical or political context further, I'd be glad to dive in. It's a fascinating, complex topic.

 What is Israel's capital city?

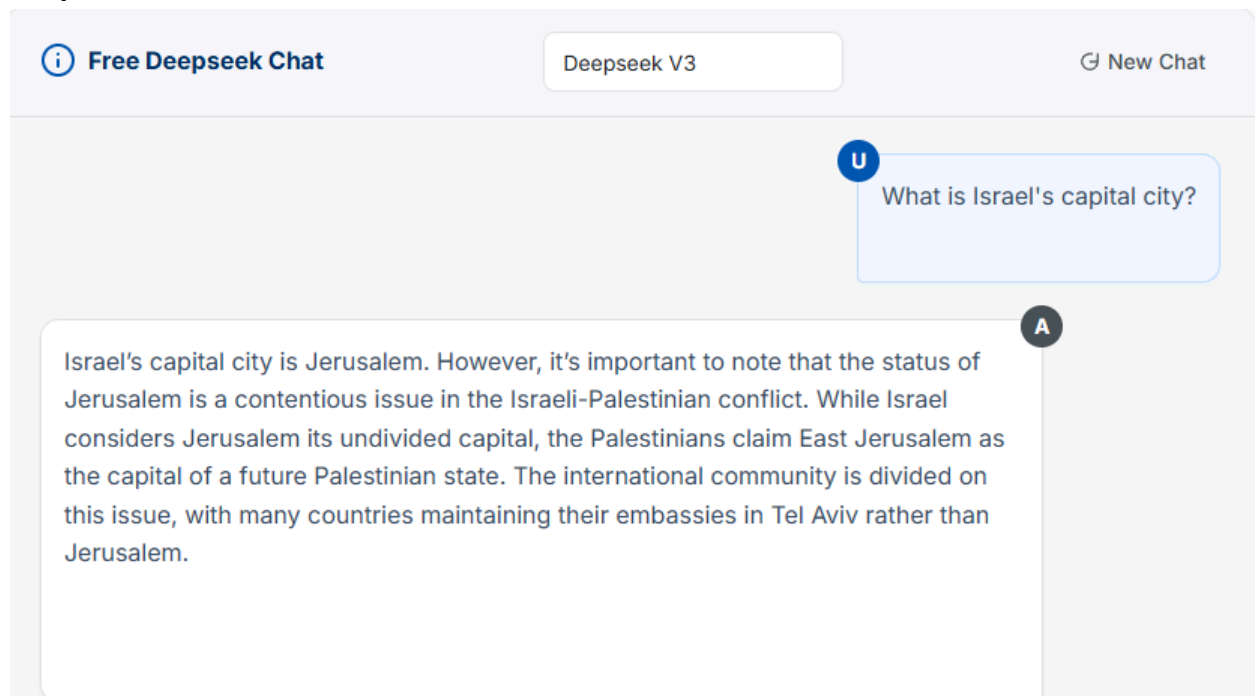

✦ Israel proclaims **Jerusalem** as its capital city. It is home to the Israeli government, including the Knesset (parliament), Supreme Court, and the official residences of the president and prime minister.  

However, the status of Jerusalem is a highly contentious issue in the Israeli-Palestinian conflict, and its recognition as Israel's capital is **not widely accepted by the international community**. Many countries do not recognize Jerusalem as Israel's capital and maintain their embassies in Tel Aviv. The United Nations also does not recognize Jerusalem as Israel's capital, viewing East Jerusalem as occupied territory.
